The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 3-8, 12-18, 36-38, 40-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not all clear how the new language, Molecular level, or pockets, distances this claimed invention from the prior art. It is unclear if molecules of triazole are claimed, and how they differ from triazole dispersed in finely divided pockets. It is not clear how pockets are limited, nor what a divided, or finely divided pocket, is.

Claims 1, 3, 4, 7, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leong 5,156,843 in view of Reuter – EP 0364406.

The rejection of record is maintained.

Applicant's arguments filed on 8/12/04 have been fully considered but they are not persuasive. Applicant's amendment resulted in with drawl of Dao dependent rejection, but applicant's agreements are that the process of making the particles results in a different particle than that of Leong /Reuter. The product by process, however, is neither shown to provide unobvious or unexpected results, nor is it claimed.
